Welcome to KRIYANTHA BUSINESS SOLUTIONS

Connected Business Technology

Kriyantha Business Solutions helps businesses simplify complex operations through practical automation, AI and connected technology. We work closely with every client to build solutions that fit their people, processes and goals.

About Us

Modern businesses often depend on separate tools, manual follow-ups and information scattered across teams. This makes everyday work slower and prevents decision-makers from seeing the complete picture.

Kriyantha brings these moving parts together. From customised AI business portals and workflow automation to intelligent devices and operational monitoring, we connect digital and physical processes into one practical dependable system.

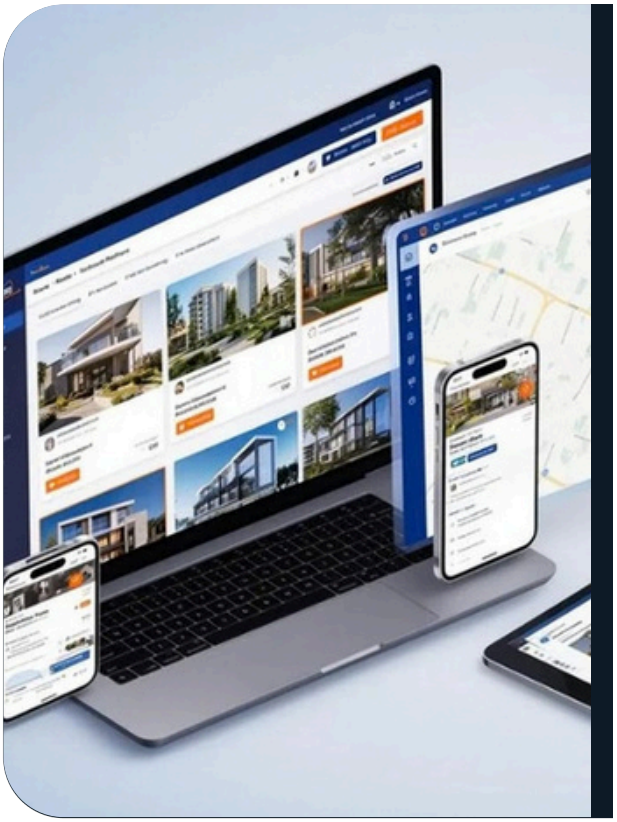

Technology should make work simpler, clearer and more connected.

HOW WE WORK

- Understand the operation before recommending technology.
- Build around real business requirements.
- Connect useful existing tools wherever practical Design for clarity.
- Future growth Support after the system is implementation.

About
Our Services

AI BUSINESS PORTALS

A secure, customized workspace that brings workflows, business information, reporting and approved AI tools in to one controlled environment.

CORE CAPABILITIES

- Automated workflows for enquiries, approvals, HR, contracts, quality checks and requests.
- Customer and partner portals for documents, updates and communication.
- AI-powered company knowledge search Integration with existing business systems.
- Role-based dashboards for sales, finance, operations, projects and more.

OUTCOME
Less manual work, faster decisions and one dependable view of the business.

AI + HARDWARE INTG.

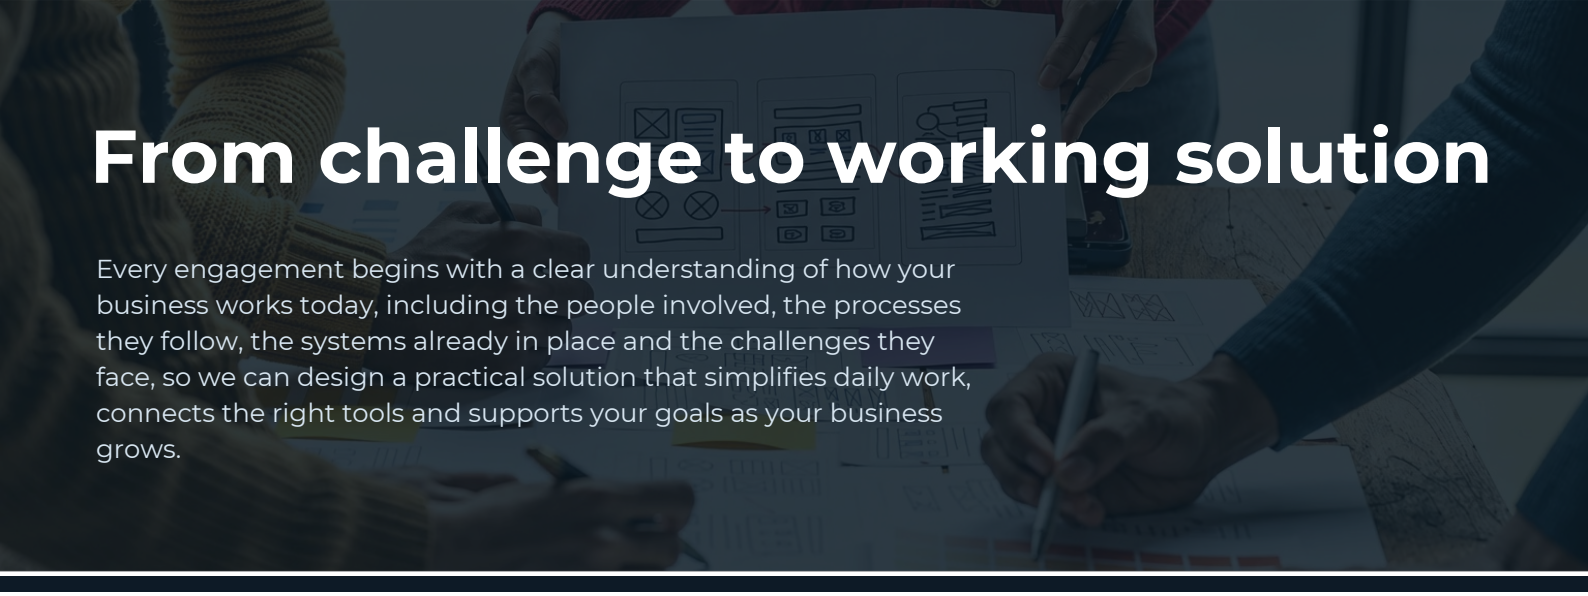

We connect cameras, sensors, machines and edge devices to intelligent workflows so real-world events lead to timely, accountable action.

CORE CAPABILITIES

- Vision-based detection for products, defects, PPE, people, vehicles and restricted areas
- Inventory tracking through cameras, RFID, sensors and connected devices
- Automated counting, barcode/QR reading, sorting and jam detection
- Live machine and environmental monitoring, including temperature, vibration, runtime and energy

OUTCOME
Physical activity becomes measurable information and responsible action.

From challenge to working solution

Every engagement begins with a clear understanding of how your business works today, including the people involved, the processes they follow, the systems already in place and the challenges they face, so we can design a practical solution that simplifies daily work, connects the right tools and supports your goals as your business grows.

Our Approach

01

ASSESS

We understand the process, the people involved, existing systems and hardware, and the outcome you want to achieve.

02

DESIGN

We define a practical first release and decide how the new solution should connect with useful tools already in place.

03

BUILD

We deliver in reviewable stages, test with real users and refine the system around day-to-day work.

04

SUPPORT

After launch, we agree on monitoring, maintenance and improvements so the solution can grow with the business.

About Our Work

Practical automation shaped around the way real teams work.

AROMAZEN PRIVATE LIMITED

CHEMICAL & FRAGRANCE SECTOR

THE CHALLENGE

Manual work, fragmented records and delayed follow-ups across multiple departments.

WHAT WE'RE BUILDING

Connected workflows for accounts, HR, marketing and quality, alongside a private AI workspace using approved company information.

THE VALUE

Better information flow and less manual processing across the workflows included in the project.

ELECTROTECH Services

INDUSTRIAL HEATING & CUSTOM MACHINERY SECTOR

THE CHALLENGE

Manual work, fragmented records and delayed follow-ups across multiple departments.

WHAT WE'RE BUILDING

Connected workflows for accounts, HR, marketing and quality, alongside a private AI workspace using approved company information.

THE VALUE

Better information flow and less manual processing across the workflows included in the project.

ActivBite

PACKAGED FOOD SECTOR

THE CHALLENGE

Customer information and follow-ups were spread across separate records and manual processes.

WHAT WE'RE BUILDING

A central CRM dashboard with customer information, task tracking and operational records in one workspace.

THE VALUE

A clearer view of customer activity and pending actions, helping the team coordinate day-to-day work more consistently.
